

**Fenton Township, MI
Mosquito Management
Community Outreach Program 2024**

The Fenton Township Mosquito Management program was implemented in 1989. APM Mosquito Control (APM) performs the mosquito control program for Fenton Township. The program consists of all phases of an Integrated Mosquito Management strategy against mosquitoes in the township.

1. Adult mosquito monitoring/Disease Testing.
2. Breeding site inspections and larviciding.
3. ULV Adulticide applications.
4. Perimeter Barrier Adulticide applications.

Detailed information about the program is available at the township offices. In an effort to notify residents within the township for community Larviciding and ULV adulticide applications APM and Fenton Township utilize the following methods:

1. Public notice in newspaper. A notice appears in the local paper explaining seasonal larviciding and seasonal adulticiding. Also allows anyone interested in further information to contact APM or township.
2. The township posts information about the mosquito program on the bulletin board of the township offices, as well as on their website, www.fentontownship.org.
3. The township frequently posts current information regarding the mosquito management program on the local cable television channel.
4. A brochure about the mosquito control program is available at the township hall. The Brochure explains how the whole program works and gives any resident the opportunity to not participate. See Brochure included with this correspondence.

5. A Call/Shut-off notification list is maintained as part of the township program. Before ULV adulticide applications take place APM will call any residents that request to remind them and inform them that a community mosquito control application will be happening that evening, weather permitting. Residents may also request that the ULV adulticide be shut off in front of and or upwind of their area. These areas are staked and noted on ULV adulticide operational maps.
6. Mosquito control is often a topic of discussion at township meetings and residents are always encouraged at meetings to find out more about their local mosquito control program. APM holds open house events for residents at the request of the township. These events introduce the personnel assigned to service the area; an overview and demonstration of equipment used and information on materials used to provide mosquito control.
7. Information (sample labels & SDS) on insecticides used in program are available upon request by calling APM at (810) 766-9423 or (877) 276-4714 and are available at the Fenton Township offices and the APM website at www.advancedmosquito.com

The contact person that can respond to public questions is Ben Seago at
APM Mosquito Control.
