Fenton-Thompson Watermain Extension Project

Water is coming to Fenton Township!

The watermain project is part of the development plan for the Thompson Road Corridor; and the updates to the Fenton Township Master Plan taking place via the Planning Commission through 2023.

The water system will bring options to homeowners, businesses, and the Lake Fenton School District buildings that are located within the Thompson Road Corridor.

In October 2021, the Genesee County Board of Commissioners allocated \$6.5 million to the project from the American Rescue Act Funds (ARPA) that the county received.

The watermain project itself is being lead by the Genesee County Drain Commission as the project is an extension to the Genesee County Waster Supply System that will bring water to the southern area of Genesee County.

IF YOU HAVE ANY QUESTIONS ABOUT THE PROJECT, OR THE MASTER PLAN, YOU CAN CONTACT THE FENTON TOWNSHIP ZONING ADMINISTRATOR MIKE DEEM AT (810) 629-1537 OR BY EMAIL MDEEM@FENTONTOWNSHIP.ORG

Watermain Project Phase 1 and Phase 2

Phase 1 of the project broke ground in late November 2022 on Fenton Road. This phase will extend from Mundy Township south on Fenton Road to Thompson Road. The watermain will then continue west along Thompson Road to Jennings Road.

The proposed Phase 2 of the project would see the watermain go south on Torrey Road (from Thompson Road) to Lahring Road and then west to Jennings Road and back north to Thompson Road.

Together Phases 1 & 2 would bring the water system to all four Lake Fenton School District buildings.
